More Members, More Power!

Did you know unions are more popular today than they have been since 1967*? In fact, a 2023 poll found that 58% of non-supervisory workers would join a union if given the option—that number is 65% for workers under 30*!

The power behind any union is its members, and the responsibility of membership recruitment should not fall to one person. So bring your team to this interactive session where you will acquire practical skills for strengthening your local.

PLUS...Your Division Officers are offering ESP incentives to the locals with the most successful Early Enrollment campaigns. Learn about those prizes and get the tools you need to level up your recruitment efforts.
