PSEA wanted to make sure you heard the news…your 2020 primary election date has been moved and is now Tuesday, June 2nd.

The coronavirus pandemic is creating challenges for so many people. PSEA understands that and we’re here for you. This crisis shows why it is so important we keep fighting together for what we believe in. And that includes fighting for our democracy. You can stay safe and stay engaged by voting from home.

Our democracy depends on active participants. Choosing to vote by mail gives Pennsylvanians like you the certainty, flexibility, and comfort of voting from home.

➢ All Pennsylvania voters can now vote by mail. Any voter can easily sign-up and get a ballot sent to your home for the June 2nd primary and general election. You do not need an excuse to vote by mail. Your online application will go right to your county, which will send a ballot to your home address.

➢ We’re voting by mail and so should you. Your neighbors are voting from home for the upcoming primary. Essential workers are voting by mail to protect their right to vote even if they have to work. Elected officials are voting by mail because the system is secure. Community leaders are voting from home to ensure their voice is heard.

➢ Voting by mail provides certainty in uncertain times. We don’t know what the coming months may bring and that can be unsettling. That is normal. But our democracy depends on active participants. Choosing to vote by mail gives voters the certainty, flexibility, and comfort of voting from their home if they prefer.

➢ Voting by mail is a secure system with safeguards against fraud. Active military, many seniors, and people who are sick have used mail-in ballots for decades. The integrity of our vote-by-mail system is strong and we can ensure every vote is counted. There is no reason to doubt that your vote will be counted in Pennsylvania, whether you vote from home or at a polling place.
