# RCPE SESSION DESCRIPTIONS

## EARLY CAREER EDUCATOR SYMPOSIUM

PSEA is hosting this full-day professional development to help early-career educators (1-5 years) start strong with practical tools, ready to use resources, and valuable connections. Interactive sessions and grade-level breakouts will cover union basics, contract essentials, classroom management, legal guidelines, parent communication, and professional growth opportunities. Networking with colleagues and PSEA representatives will take place throughout the day, with lunch featuring a presentation on union benefits and development offerings.

## UNSCRIPTED SOLUTIONS: THE EDUCATOR'S OPEN FORUM

Join fellow PSEA members for an Open Space conversation on emerging trends and pressing challenges. In this participant-driven format, you set the agenda -- choosing the topics that matter most and engaging in small-group discussions that encourage idea sharing and practical problem-solving. Unlike traditional conferences with fixed schedules and predetermined speakers, this approach empowers you to shape the conversation. Potential topics may include family engagement, student behavior, technology integration, and school climate. While we may not have all the answers, you'll leave with new insights, stronger sense of community, and the reassurance that we are navigating these challenges together for the good of our students and communities.

## TEACHING IN THE AGE OF A.I.

Artificial intelligence is rapidly transforming education - bringing new possibilities, challenges, and responsibilities for today's educators. In this interactive 90-minute session, participants will explore how AI tools are shaping teaching and learning, from lesson planning and differentiation to student engagement and assessment. Through live demonstrations, discussion of ethical considerations, and hands-on small-group activities, educators will discover how to leverage AI effectively while maintaining academic integrity and supporting student success.
