REGISTRATION DEADLINE: September 14, 2021, by 5:00 pm
About the Program

Many species face the threat of extinction, with animal populations becoming endangered due to a variety of causes. During the Understanding Endangered Species workshop, you will get the chance to learn more about the endangered and threatened animals living at the Pittsburgh Zoo and what zoos are doing to help in the conservation of these incredible animals. You will also learn what it means when an animal is on a Species Survival Plan and about the conversation projects that the Zoo participates in through the world.

Course Participants Will:

* Explain the role of zoos in the identification, study, and preservation of endangered and threatened species.

* Describe the Species Survival Plan at the Pittsburgh Zoo & Aquarium.

* Identify various factors which make some animals and plants more prone to extinction than others.

* Gain an increased knowledge of the naturally-occurring and human-induced problems for threatened and endangered species.

* Discuss relevant local and global field research supported by the Pittsburgh Zoo & Aquarium.
This *free event* is limited to the first 20 PSEA Southwestern Region members.

Please join us on September 25, 2021,* from 9:00 a.m. to 3:00 p.m. at:
