psea.org

August 2019

Listing of Courses

PSEA is dedicated to assisting its members in all aspects of their careers including their standard of living, their work environment and their professional growth and development. The Professional Learning Exchange presents multiple opportunities for members to seek their personal best in their work. Ultimately it is the individual's responsibility to determine their professional needs and to engage in those activities that maximize their professional effectiveness. The standards that members apply to their performance reflect the commitment they have for their profession.

One of PSEA's Strategic Priorities is Quality Education. "PSEA will provide quality educational services, advocate for all students to have access to effective learning environments and advance pro-public education policies." PSEA strives to achieve this goal with the Continuing Professional Development (Act 48) Program - The Professional Learning Exchange.

Act 48 was enacted on July 1, 2000, and mandates that all PA educators have continuing professional education. PSEA's continuing professional development program, known as the Professional Learning Exchange, offers workshops approved for Act 48 activity hours. Approved faculty consists of PSEA staff, and in some cases, selected PSEA members.

Most workshops are available weekdays, evenings and weekends. Contact the Education Services Department for assistance at 800-944-7732 or you can contact the presenter directly in the region office. Please provide the workshop title, date, location and an approximate number of participants. The minimum session size is fifteen (15) unless otherwise noted. Flexibility is given with the presenter's permission. There is no cost for the sessions.

Additional trainings may be available throughout the year. Check PSEA's website for more information.

The Professional Learning Exchange's Continuing Professional Development Program will be updated in January and August.

Look for the icon **NEW** which indicates that
the course is new since January 2019.

and

Look for this icon ※ which indicates that the course
will be especially helpful for new teachers.

Each course is labeled to help form an easy understanding of the course length, audience, and topic area.

Look for color coded labels to show which courses are eligible for Act 48 (marked with an EA) or Chapter 14 (marked with an ESP) hours. Courses are also marked if PSEA believes they may be particularly useful for Student PSEA members or for PSEA early career educator members.

To submit Act 48 hours to PDE, PSEA members must provide their PPID number to PSEA. Act 48 hours will be reported to the Department of Education at least every 30 days. Paraprofessional members are encouraged to seek prior approval of the session from your employer to ensure that it qualifies for the 20-hour requirement in their school district. Employers have the final say on which trainings they will accept for Chapter 14 credit. Upon completion, you will receive a certificate that you can submit to your employer. ESP members need to be connected to a printer to print the certificate documenting participation.

Additional color codes display whether courses are available online or on-site. Online courses are provided for members 24 hours a day on the internet. Online courses also may be available via videoconference or webinar technology.

Finally, each course is color coded to designate learning goals related to one or more topic areas:

- Art and Science of Teaching

- Education Policy

- Culture and Climate

- Professionalism.

Act 48 credit hours will be uploaded to the PA Dept. of Education at least every 30 days.

Each online course includes a test at the end to complete to verify attendance for one person. Failure to complete the test will result in an incomplete and no action to report completion of the professional learning course will be taken by PSEA. The online system is not set up to document group staff development. If you are interested in using an online course for group staff development, please contact PSEA's Education Services Department.

Everything You Think You Don't Know About Sexual Harassment

Onsite

3

This program serves to prevent participants from being caught off-guard and ending up on the wrong side of a sexual harassment lawsuit. Many times individuals are unaware of what the law really states. The program provides legal background on the issue, breaks myths under which school employees and students may be functioning and identifies the negative impact of sexual harassment on students.

Effective Classroom Management for Today's Teacher: What Does the Research Tell Us Works?

Onsite
Online

1 – 2

This contemporary session is for both elementary and secondary teachers and it introduces participants to Harry Wong's work on classroom "procedures" and Robert Marzano's work on the most effective research-based classroom management strategies. It encourages educators to examine and reflect upon their own practices in terms of the Marzano's descriptions and categories. Participants will walk away with an enhanced understanding of where their own practice is strongest, learn from the strategies, techniques, examples of other teachers and will leave with numerous resources and stratgegies to improve their own craft and technique immediately within the confines of their own classroom.

Participation of Students with Disabilities in Dual Enrollment Programs

Online — 1

A trend in the field of education is for students to be dual enrolled in both high school and post-secondary educational systems. This trend has created a lot of questions for both staff in the high school and the higher education system for students who have identified disabilities and receive services in their public schools through the IEP process. Where do IDEA and ADA fit into this hybrid program? This course will explore what is known about this topic, safeguards when developing or being involved in dual enrollment programs, and areas yet to be defined by regulations and the courts.

Parent Engagement

Onsite — 1-3

The federal government surveys parents yearly on the issue of how their school district engages them in communication and working as part of a team on behalf o their child with disabilities. This information is compiled and a pass or fail grade is given to the state. PSEA sees the value in this statewide effort and has developed a program to have members reflect and review current practices as well as consider how they can individually or as a group promote better communication and collaboration with families. This creates a win-win situation.

Grammar & Mechanics Instruction to Improve Student Writing

Onsite

1-1.5

This session will introduce participants to a grammar and mechanics instructional approach that that is a hybrid, "middle-ground" approach, combining elements of Traditional School Grammar (TSG) direct instruction with strains of the "context-only" approach insisted upon by the likes of Atwell (1987), Weaver (1996), and others all with the express aim of helping students become more syntactically aware, fluent, mature, and effective writers. Participants will receive an understanding of this research-based, "middle ground" approach, complete with examples of pre-, post-, and formative assessments, instructional frameworks, and growth tracking and reflection and meta-cognitive awareness processes and instruments for students that they will be able to put to immediate use with the students in their classes to help students improve, foundationally, as writers.

Educating the Whole Student

Onsite

1.5

Educating the whole student is an approach to promote the long-term success and development of all students both in and outside of school. By educating the whole student, educators look to improve the health of students while preparing them to be lifelong learners and productive citizens of society. This session will explore what is meant by "Educating the Whole Student", the essential components of this model, and how the entire school community plays a vital role in the success of all students. The whole student model is based on five tenets: Healthy, Safe, Engaged, Supported, and Challenged. We will discuss how you can use these tenets to educate parents and gain their support as partners in education. It takes a whole school and a whole community to educate a whole child.

620   In-School Work Experiences for Students with Special Needs

2

EA
ESP

This course is helpful for those who either work with students with special needs in experience or are thinking about developing a program. The presentation will start out with non-paid work experience in a school setting and then move to paid work in a school setting. Typically, students who need work experience and/or job coaching start out with opportunities within a school setting. It is a good, safe, and convenient starting point. The course will cover those items you must have on your "to do" list so that you are procedurally correct and will help you if your program is questioned. We throw in a few examples of real-life situations that you may find yourself facing and some strategies to consider as solutions. Let's get to work!

Effective Reading Instruction Across the Content Areas

Onsite

1.5-3

The PA Core Standards call for students to independently read, analyze, and synthesize information from multiple texts and to the use evidence from the texts to formulate well-defended claims with clear evidentiary support. This session will present educators with information and tools to support reading instruction across the content areas. It includes a

※

variety of specific strategies and take-away resources that content area teachers can immediately build into their lesson planning and actualize in their instruction.

Topic Area:

Art and Science of Teaching			

Presenter: Clayton, Chris   Region or contact person: HQ

1322 **Effective Writing Instruction Across the Content Areas**   2-3

EA
ESP
Student

※

Onsite

The PA Core Standards call for students to independently read, analyze, and synthesize information from multiple texts and to the use evidence from those texts to independently write informational, narrative, and argumentative pieces of their own, formulated with well-defended claims and clear evidentiary support. Geared toward the MS and HS levels, this session will present teachers with information and tools to support writing instruction across the content areas. It includes specific instructional and assessment strategies and "take-away" resources that educators can immediately actualize into their lesson planning and classroom instruction.

Topic Area:

Art and Science of Teaching			

Presenter: Clayton, Chris   Region or contact person: HQ

1323 **Effective Vocabulary Instruction Across the Content Areas**   1-2

EA
ESP
Student

※

Onsite

The PA Core Standards present unique demands on students' ability to learn vocabulary and teachers' ability to teach it. In this session educators will come away with knowledge, strategies, and resources to help foster a successful school-wide vocabulary approach across the content areas, guided by both academic and content-area vocabulary. Word knowledge contributes significantly to reading comprehension and to general academic achievement, not only in reading and language arts but also across content areas. Students learn vocabulary best when teachers make consistent use of direct and indirect vocabulary instructional strategies. This session discusses the importance of comprehensive vocabulary instruction and provides examples of instructional tools and strategies that teachers can immediately apply in their classes.

Included will be a discussion of the shift inherent in moving from "institutionally organized" to more "self-organized" educational practices and the integral role that technology has played and is playing in this monumental shift. From "BYOD" (Bring your own device) to "1 to 1" (one device for each student provided by the district) to "Blended Learning" and "Flipped Classrooms," this session will focus on exploring these educational technology paradigms of instruction and will present attendees with information, strategies, and "take-away" tools and resources that educators can immediately actualize into their planning and instruction. Beginning with "why" technology should be used in the classroom with a myriad of web-based and app resources that teachers can use to effectively integrate devices into the classroom.

Classroom Management: Could Your Mental Set Need a Reset?

Onsite

1.5

Good classroom management techniques are essential to foster a positive learning experience. Every year we find teachers that have been pushed and pulled all year long. Eventually a teacher lashes out in a way that then puts the teacher in a bad position of not maybe having made the best decision. This leads to the teacher spending sleepless nights full of worry until the situation is resolved. This session will review research-based classroom management techniques that will reinforce all of the great things you are already doing while reminding you of things you haven't recently implemented. It will also allow for dialogue with colleagues from the Region to talk about things that practically work and how to keep yourself centered when the year starts to be trying.

Bystander Intervention Training

Onsite

2

Bullying is a topic that is consistently in the headlines but is difficult topic to address and eliminate. Being the bystander that intervenes is a best first step to combatting the problem and providing support to a victim to end the abuse. The problem is that when you are the person witnessing a situation it sometimes becomes difficult to act. This training will focus on talking about hurdles that keep us from intervening in all different kinds of bullying situations that involve adults and students. We will also discuss trusting your instincts and strategies that help make intervening easier. Finally, we will practice some scenarios to help you be at ease with intervening.

What's Your Storri? Educators Using Narrative to Unpack Wobble Moments in Their Practice

Onsite

1

As you teach, invariably you will encounter wobble moments, those instances where a student says or does something that causes you to stop and pay attention. These moments, if captured in a narrative and reflected on systematically, can provide profound insight into how you teach and how your students learn. In this workshop, we explore wobble moments, examine examples of narratives depicting such moments, write your own wobble story and use an oral inquiry process to help you gain multiple perspectives on your classroom. In addition, we will explore the STORRI website as a possible destination for sharing wobble stories.

Teaching Post-Truth: The Empathy Advantage, Empirical Facts, and Activism

Onsite

1

Participants will be empowered to teach and model emotional awareness and empathy, teach and be media literate, and advocate for such programs. The presentation reviews the reported changes in bullying and harassment before and after the 2016 election. The session includes a brief lesson on implicit bias and the pervasiveness of stereotypes to help educators understand their own perspective prior to helping students prevent bullying by teaching empathy. Then, this session asks participants to focus on why we are all responsible to support "facts" as they relate to teaching standards. Finally, the discussion turns to how we may all personally advocate for ourselves and for students.
