

# Midwestern Region PSEA Act 48 Workshop

## The Pittsburgh Zoo & PPG Aquarium

May 4, 2019

9:00 AM—3:00 PM

In this 6-hour Act 48 approved workshop, participants will gain a teachable understanding of the causes of global warming, its effect on natural systems and possible solutions. Solutions will be addressed on four basic levels—individual, local, national and global. Participants will be challenged to address their own behaviors to create positive change. They will also learn how American consumers will dictate the future of global warming and how developing countries can learn from America's industrial past.

The workshop will incorporate guest speakers, live animals and special tours. Participants should meet in the Pittsburgh Zoo's Education Complex, located across from the carousel.

Attendance is free to MW Region PSEA members, but registration is limited. To register, contact Terri Francis at [tfrancis@psea.org](mailto:tfrancis@psea.org) or call 1-800-942-8025 no later than April 26. Please provide your name, school district of employment, and PPID number.
